Intelligent Heating Control

Viessmann with tado° smart thermostat

Warm up your home the smart way!

Viessmann, a leading manufacturer of efficient heating and energy systems for 100+ years, is proud to present its customers with tado° smart thermostats for the operation of Viessmann systems. tado° offers a wide range of intelligent functions that can save on heating costs and improve comfort in the home.

Save money

Most customers will start to save money straightaway

More comfort

The smart tado° temperature control assistant ensures maximum comfort automatically

Control from anywhere

Set the temperature of your tado° app whenever you want and wherever you are - via app, tablet or PC

Detailed information

Get instant access to detailed reports so you're always up to date with your heating consumption and usage

Your Smart Temperature Control Assistant

tado° is easy to install and compatible with 95% of heating systems currently on the market. The system consists of a smart thermostat and smartphone app and is able to optimise the operation of the heating system, ensuring comfort and lower energy costs of your Viessmann heating system.

Geolocation based control*

Weather compensation

Open window detection*

Multi room control

Smart programming

Management of domestic hot water

Free apps and updates

Viessmann with tado° app

*tado° uses your smartphone's location services to send you notifications to reduce the temperature when you're not at home or automatically (chargeable) bring it back to the values you set when you're about to return.

Smart Thermostats

tado° can replace conventional thermostats and radiator thermostats already installed and is compatible with both central heating systems and autonomous heating systems from different manufacturers. Simply choose the Starter Kit you need and add more smart thermostats if you need to control multiple rooms or zones independently of each other.

Smart Radiator Thermostat

Smart Thermostat

Temperature sensor

Data security

Internet connection

Automatic updates

Suitable for any type of home

tado° is a smart thermostat and smartphone app, which is compatible with all Viessmann boilers. Simply choose the Starter Kit you need.

Each Starter Kit includes an Internet Bridge to connect to your router, which provides Internet connection to all tado° devices.

Starter Kits

Smart Thermostat - Starter Kit
Manages your heating system in place of the wired room thermostat; for use with WiFi please add the extension kit.

Smart Radiator Thermostat - Starter Kit
Manages the thermostatic valve of your radiator; it works independently of any room thermostat present

Accessories

Smart Thermostat
Replaces additional wired thermostats in the event of multi-zone heating systems

Smart Thermostatic Sensor
For rooms fitted with radiators

Extension Kits
Allows wireless boiler control when used in combination with the smart thermostat
